

Proficiency Test II

Jay Agustin

Task 1

```
for (i in 1:3) {  
  print(mtcars$mpg[i])  
}
```

```
[1] 21  
[1] 21  
[1] 22.8
```

Task 2

```
count_above <- function(x, cutoff) { #creates a function count_above w/ inputs x and cutoff

  count <- 0 #establishes a count that starts at 0

  for (i in 1:length(x)) { #for each row, starting from 1 to
    #however many rows there are in x,
    if (x[i] > cutoff) #check if its value is above the given cutoff
      count <- count + 1 #if yes, count goes up by 1
  }

  return(count) #prints count
}
```

```
count_above(iris$Sepal.Length, 6)
```

```
[1] 61
```

```
count_above(mtcars$disp, 150)
```

```
[1] 20
```
